

# Playing with boxes

1. Create the following template using CSS and div tags only

# Playing with boxes

2. Add the following buttons inside the boxes

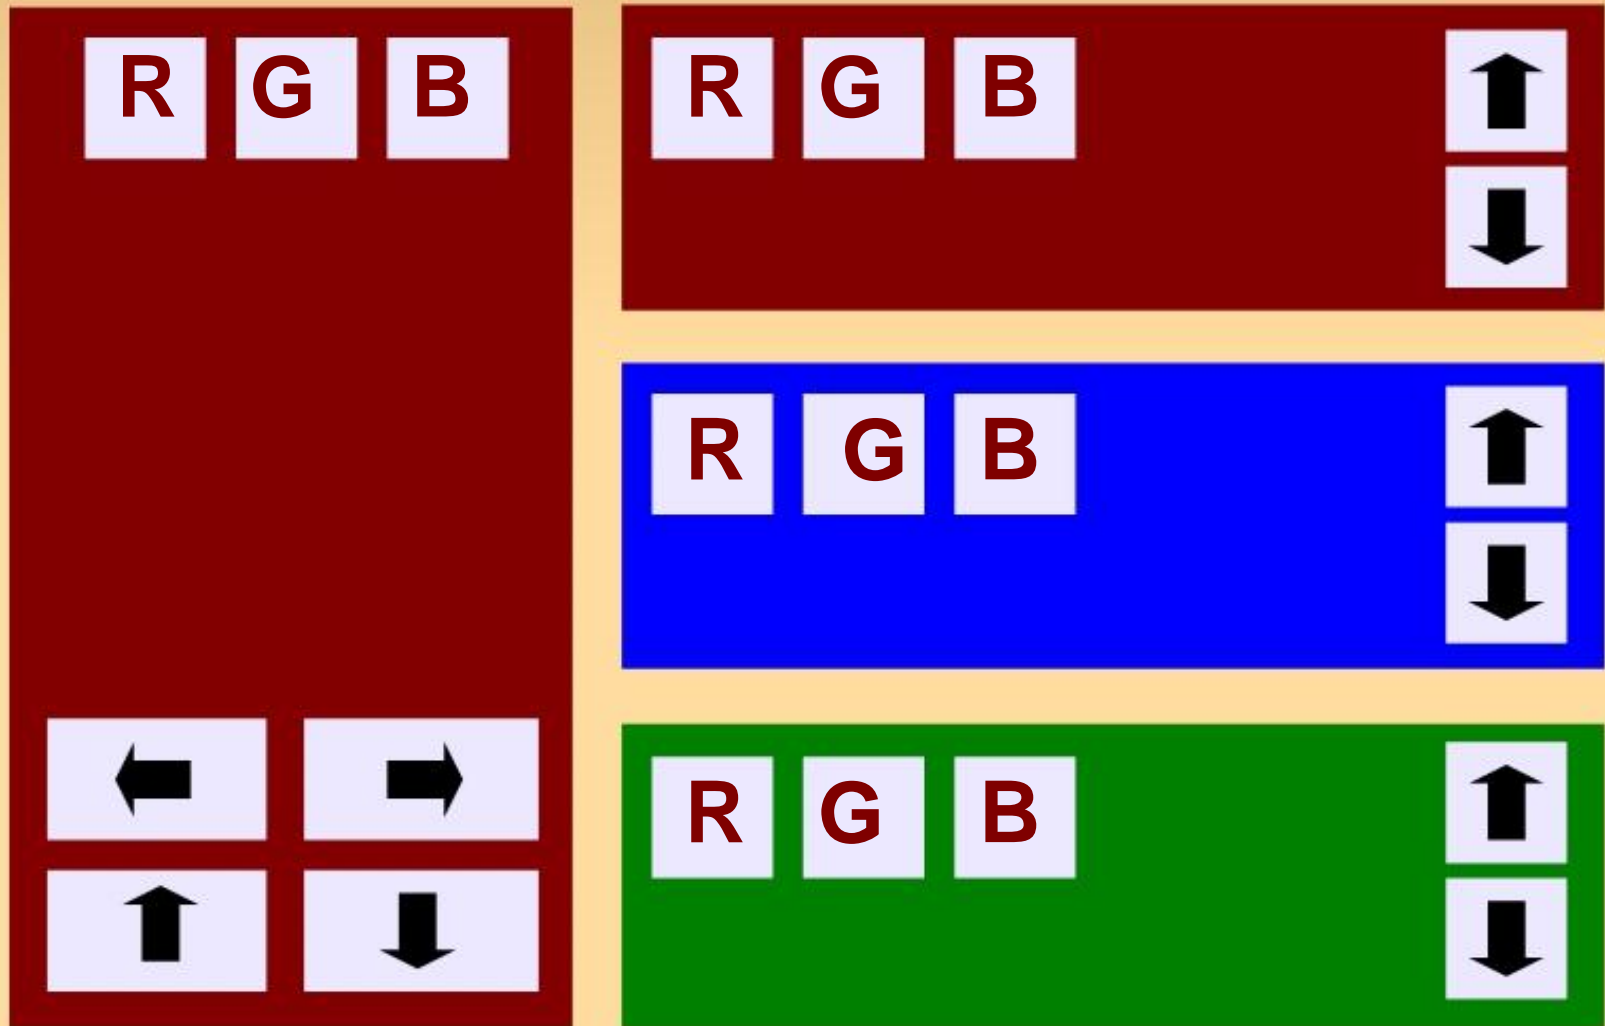

# Playing with boxes

3. On clicking the R, G or B buttons, the color of the corresponding box should change to Red, Blue or Green respectively.
4. On clicking the 'up' or 'down' button in the boxes on the right, the corresponding box should swap positions with the box above or below it. Clicking the 'up' button on the topmost box or the 'down' button on the bottommost box should NOT result in any action.

# Playing with boxes

Bottom right box moved up after clicking the 'up' button

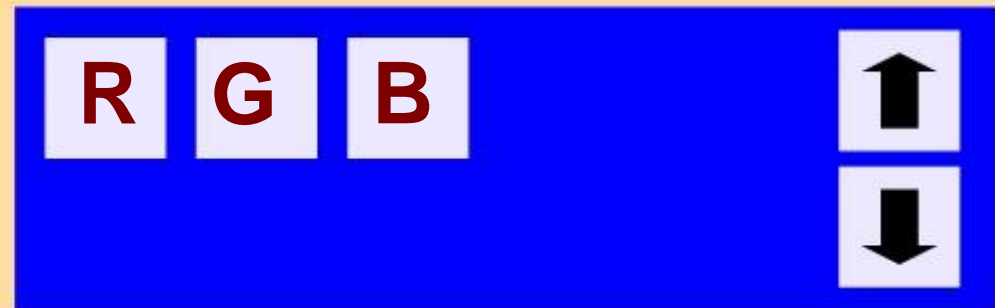

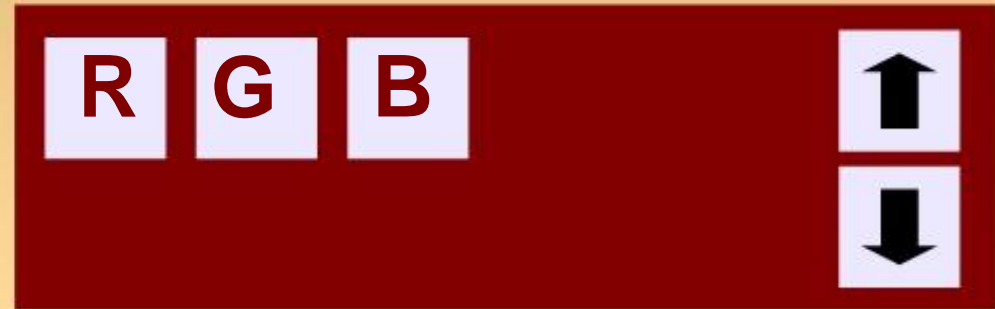

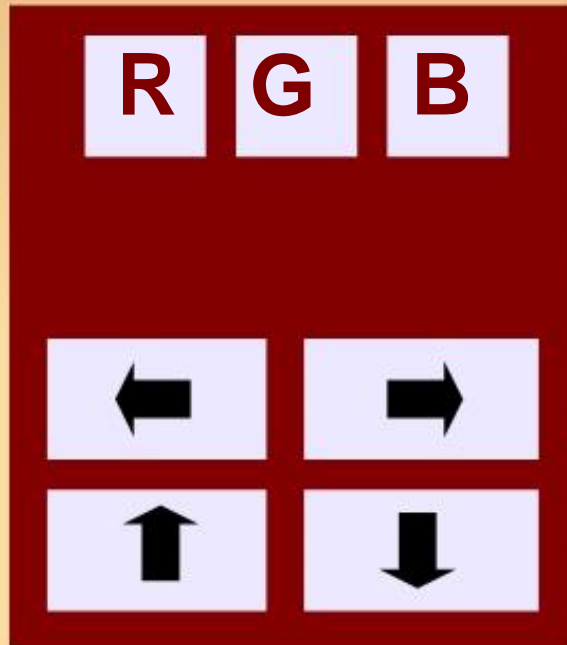

# Playing with boxes

5. On clicking the 'up' or 'down' button in the leftmost box, the height of the box should increase or decrease in steps of 10px.

The height should not increase beyond than bottom edge of the bottommost box nor should it decrease beyond the bottom edge the topmost box.

# Playing with boxes

Height of leftmost box decreased on clicking 'up' button

# Playing with boxes

6. On clicking the 'left' or 'right' button in the leftmost box, the box should swap positions with the other boxes.

Clicking the 'left' button when the box is on the leftmost side or the 'right' button when the box is on the rightmost side should NOT result in any action.

# Playing with boxes

Left box swapped position on clicking the 'right' button
